Azure AI services

Face detection, analysis, and recognition are important capabilities for artificial intelligence (AI) solutions. Azure AI Face service in Azure makes it easy integrate these capabilities into your applications.

## Learning objectives

Learn how to use Azure AI Face service to detect and analyze faces in images.

[Start >](#)[⊕ Add](#)

## Prerequisites

Ability to navigate the Azure portal

## This module is part of these learning paths

[Microsoft Azure AI Fundamentals: Computer Vision](#)

### Introduction

2 min

### Understand Face analysis

3 min

### Get started with Face analysis on Azure

4 min

### Exercise - Detect faces in Vision Studio

15 min

### Knowledge check

2 min

### Summary
