Exercise - Explore content filters in Azure OpenAI

25 minutes

One of the most effective ways to mitigate harmful responses from generative AI models in Azure OpenAI is to use *content filters*. In this exercise, you deploy an Azure OpenAI model and observe the effect of content filters on the responses it returns.

> ⓘ **Note**
>
> To complete this lab, you will need an **Azure subscription** ⬀ and you need to be approved for Azure OpenAI access. If you need access, apply at the **Azure OpenAI limited access** page.

Launch the exercise and follow the instructions.
