Fundamentals of conversational language understanding

42 min • Module6 Units

Intermediate   AI Engineer   Developer   Solution Architect   Student   Azure

Azure AI Bot Service   Azure SDKs

In this module, we introduce you to conversational language understanding, and show how to create applications that understand language with Azure AI Language.

Learning objectives

In this module, you'll:

- Learn what conversational language understanding is.
- Learn about key features, such as intents and utterances.
- Build and publish a natural-language machine-learning model.
